

Ceiling Light Diffusion

VEGA's Ceiling Light Diffusion fabric is a newly developed louvered style front projection media which effectively reject directional ambient light from the top such as decoration spot light, as well as providing enriched color and high contrast images. Together with desktop use short throw projection, it becomes a new generation of large scales home theater display.

MARCO VIEW

FEATURES

- Louvered style micro structure in diffusing ceiling ambient light
- Ultimate color reproduction
- 4K Ultra HD ready
- 180° wide viewing angle
- Mildew resistant
- Non-transparent back surface preventing light penetration
