

# Next Generation MattePro8Ks

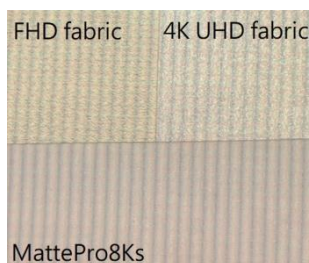

Technology is developed in tremendous speed nowadays, and 4K resolution has already been the basic requirement for home cinema. Vega stands apart from the others by announcing the MattePro8Ks screen fabric which supports real 8K projection. The diamond-like texture offers ultra-fine pixel at 5 pixels /mm which ensures ultimate uniformity and utmost sharpness on the projected image, triggering true extraordinary viewing experience of the audiences. As broadcasters are ready to produce 8K content for the 2020 Tokyo Olympics, it is the right timing to bring the audience to a gorgeous color horizon by letting them fully enjoy the visual feast brought by the ultra-vivid and clear picture.

## ULTRA-FINE 5 PIXEL / mm

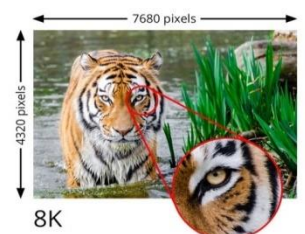

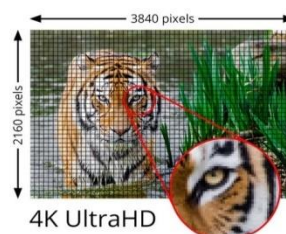

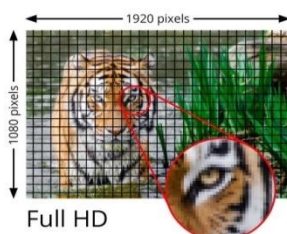

## RESOLUTION BOOST UP
