

VEGA MFG LTD took part in the InfoComm China 2009

VEGA MFG LTD had participated in the InfoComm China 2009 in Beijing, which was held on 9th–11th November 2009. It gave us an excellent opportunity to meet our existing customers as well as providing an effective way to explore new businesses.

▲ We customized an elegant booth design at InfoComm China 2009.

▲ ST600 and ST1200 mounts are well-designed for short throw projectors

We had showcased the latest models of our projection screens and projector mounts at our booth, among which the edge-cutting 2-side electric screen – ScreenMix was most impressive to the visitors. They were delighted with the comprehensive range of projector mounts offered, especially the short throw mounts – ST600 and ST1200. Both models are made of steel and well-designed for short throw projector.

This show turned out to be the best to us in 2009.

See you again in the next InfoComm China!

▲ Customers expressed great interest in our products and paid much attention to our product demonstration.

▲ Our Factory Manager, Mr. Gordon Leung, was invited to have an interview with media in China for introduction of our latest products.
